About Med Spok Solutions

Med Spok Solutions supplies, installs and maintains medical equipment for hospitals, nursing homes, clinics and patients at home.

MED SPOK SOLUTIONS PVT LTD supplies medical equipment for hospitals, nursing homes and patients at home: CPAP and BiPAP machines and masks, oxygen concentrators and cylinders, suction machines, patient monitors, wheelchairs, hospital cots and physiotherapy supports.

Everything here is available on **rent** or on **sale**. Rental suits short-term needs such as post-operative recovery. Purchase suits long-term therapy. We advise on which fits the case.

We stock devices and masks from **HOME MEDIX**, **BMC** and **ResMed**, as an authorized dealer, covering consultation, site assessment, installation, training, preventive maintenance, calibration and spare parts.

Our Mission

To make dependable medical equipment available across hospitals and homes, supported by a service team that responds quickly.

Our Vision

To be the supplier that hospitals, physicians and families rely on, known for accurate advice, clear pricing and dependable service.

AUTHORIZED DEALER

We are an **Authorized Dealer** for Home Medix, BMC, ResMed and SVASTEK, supplying genuine devices, masks and consumables, with sourcing and biomedical engineering handled in-house.

CUSTOMER SUPPORT & SERVICE NETWORK

Supply & Delivery

Stocked in depth so a cot, chair or concentrator can be dispatched on the day of order.

Installation

Commissioning by biomedical engineers, with performance verified before handover.

Clinical Training

Device operation, mask fitting and cleaning routine, for staff and family caregivers.

After-Sales

AMC and CMC contracts, breakdown response, calibration and genuine spares.

MED SPOK SOLUTIONS PVT LTD

AUTHORIZED DEALER: HOME MEDIX • BMC • RESMED • SVASTEK

Your Partner in Advanced Healthcare Solutions

02

Complete Product Range

Twelve product lines covering respiratory therapy, patient monitoring, mobility, hospital furniture and physiotherapy. Every line is available for outright purchase or on monthly rental, and every line is serviced by our own engineers.

CPAP / BiPAP Machine

BMC • RESMED • HOME MEDIX

Sleep apnea and non-invasive ventilation therapy with humidification.

Oxygen Cylinder

MS-CY • B / D / JUMBO

Medical oxygen with regulator, trolley and flowmeter. No power needed.

Oxygen Concentrator

HOME MEDIX • 5-10 LPM

Continuous oxygen from room air. No refills, no delivery dependency.

Pulse Oximeter

DR TRUST • FINGERTIP

Fingertip SpO₂ and pulse rate readings for home monitoring.

CPAP / BiPAP Mask

BMC • RESMED

16 models across nasal, pillow and full face, in every cushion size.

Wheelchair

EASYCARE • FOLDING

Folding, reclining and commode models with attendant brakes.

Hospital Cot

MS-HB • 2 / 3 / 5-FUNCTION

Manual and electric cots with side rails, castors and IV pole.

Physiotherapy Products

MS-PT SERIES

Supports, braces, collars and therapy units for recovery and pain relief.

Suction Machine

MS-SU • TWIN JAR

Airway clearance and secretion management for ward and home.

Patient Monitor

PHILIPS • MULTIPARA

Multiparameter bedside monitoring with alarms and trend storage.

Nebulizer

HOME MEDIX • COMPRESSOR

Fine medicine mist for asthma, COPD and paediatric respiratory care.

Bubble Air Mattress

SYNOCARE • AIRQUILT

Alternating pressure mattress with pump, to help prevent bed sores.

PURCHASE OPTIONS

Available on rent or on sale

Rental covers short-term requirements: a cot needed for six weeks after surgery, or oxygen through a chest infection. The unit is delivered, installed and collected. Long-term therapy is normally cheaper to own outright. We advise on which option applies to each case.

RENT

Monthly terms, deposit adjustable against purchase, servicing included.

SALE

Outright purchase with warranty, installation and an AMC option.

HOW WE WORK

Delivery and installation

- Home delivery and setup by our own staff
- Caregiver training at the time of installation
- Consumables stocked for every model we supply
- Breakdown response with standby units for critical equipment

MED SPOK SOLUTIONS PVT LTD

03

Oxygen Concentrators

Home Medix concentrators draw in room air, strip the nitrogen and deliver a continuous supply of high-purity oxygen. No cylinder handling, no refill schedule, no delivery dependency.

HOME & WARD

HOME MEDIX • 5 LPM

5 LPM Oxygen Concentrator

Reliable, high-purity oxygen therapy up to 5 LPM. Quiet and energy efficient, suited to home, clinic and hospital use, with castors on all four corners.

- **Flow range** 0.5 – 5 L/min, continuous
- **Purity** 93% $\pm$ 3% across the full flow range
- **Sound level** approx. 45 dB(A) at 1 metre
- **Power draw** approx. 350 W
- **Includes** humidifier bottle, nasal cannula, spare filters

HIGH FLOW

HOME MEDIX • 10 LPM

10 LPM Oxygen Concentrator

High-flow oxygen therapy up to 10 LPM for patients with greater oxygen needs. Designed for hospitals, clinics and advanced home care, with stable performance under continuous load.

- **Flow range** 1 – 10 L/min, continuous
- **Purity** 93% $\pm$ 3% up to 8 L/min
- **Outlet** dual flowmeter option for two patients
- **Power draw** approx. 850 W
- **Duty** rated for 24-hour continuous operation

WHY THESE UNITS

High Oxygen Purity

Stable 93% $\pm$ 3% concentration, verified with an oxygen analyzer at every service.

Continuous Flow

Continuous delivery, suitable for sleep, exercise and NIV circuits.

Low Noise

Insulated compressor housing keeps bedroom operation comfortable through the night.

Energy Efficient

Optimized sieve-bed cycling reduces running cost over months of continuous use.

Home & Hospital

Same platform serves ward, nursing home and domiciliary care with common spares.

TECHNICAL SPECIFICATION	MS-OC-05 • 5 LPM	MS-OC-10 • 10 LPM
OXYGEN CONCENTRATION	93% $\pm$ 3%	93% $\pm$ 3% (to 8 L/min)
OUTLET PRESSURE	40 – 60 kPa	50 – 70 kPa
NEBULIZATION OUTLET	Optional	Standard
ALARMS	Power fail, low purity, high/low pressure	Power fail, low purity, high/low pressure, high temp
APPROX. WEIGHT	16 – 22 kg	26 – 32 kg

Indicative specifications. Exact figures vary by make and model. Confirmed configuration is issued with every quotation.

MED SPOK SOLUTIONS PVT LTD

AUTHORIZED DEALER: HOME MEDIX • BMC • RESMED • SVASTEK

Your Partner in Advanced Healthcare Solutions

CPAP & BiPAP Machines

Positive airway pressure therapy for obstructive sleep apnea, COPD and chronic hypoventilation. We carry ResMed, BMC and Home Medix devices, and we hold the filters, chambers and tubing for all of them.

CPAP

One steady pressure holds the upper airway open through the night. Auto models sense flow limitation and snore, then adjust within a prescribed window instead of running high all night. Range 4 to 20 cmH₂O, with integrated heated humidification.

BiPAP

Two separate pressures: higher on inspiration, lower on expiration. Easier to exhale against, and able to provide ventilatory support for patients who cannot tolerate CPAP. IPAP to 25 or 30 cmH₂O with adjustable backup rate.

DEVICE MODELS AVAILABLE

MODEL	THERAPY	DESCRIPTION
RESMED / SLEEP & RESPIRATORY CARE		
 AirSense 11	AUTO CPAP	Flagship auto CPAP with touchscreen and cellular therapy reporting.
 AirSense 10	AUTO CPAP	The most widely used auto CPAP platform, with heated humidification and app data.
 AirSense 10 Elite	FIXED CPAP	Fixed-pressure model on the AirSense 10 platform for settled prescriptions.
 AirStart 10	APAP	Entry-level auto-adjusting model, the most affordable in the range.
 AirMini	TRAVEL CPAP	Pocket-sized travel CPAP with waterless humidification.
 Lumis 150 VPAP ST	BI-LEVEL · S/T	Bi-level device with timed backup rate for non-invasive ventilation.
BMC / RESPIRATORY DEVICES		
 G3 A20	AUTO CPAP · WIFI	Auto CPAP with WiFi for remote therapy review and integrated humidifier.
 G2S A20	AUTO CPAP	Compact auto CPAP with expiratory pressure relief and onboard data.
 G2S B30VT	BiPAP · VOLUME TARGET	Bi-level with volume-targeted support for a guaranteed tidal volume.
 RESmart Y-30T	BiPAP · S/T	Bi-level with timed backup rate and support to 30 cmH ₂ O.
 RESmart Y-25T	BiPAP · S/T	Bi-level with timed backup rate for non-invasive ventilation.
HOME MEDIX / HEALTHCARE DEVICES		
 HM BV-30	BI-LEVEL	Bi-level supporting higher inspiratory pressures for COPD.
 HM BV-26	BI-LEVEL	Bi-level for patients who cannot tolerate single-pressure CPAP.

Model availability varies. Confirmed configuration, pressure range and accessories are issued with every quotation. AirSense 10 Elite and AirStart 10 share the AirSense 10 chassis.

Therapy as it is actually used

A mask is worn for seven hours a night, every night, for years. Fit decides whether that happens at all.

CPAP / BiPAP Masks

Mask fit is the main reason patients continue or discontinue therapy. Eighteen models across three interface types, in every cushion size, with headgear and replacement parts held in stock.

COMPLETE MASK RANGE

MODEL	TYPE	VENT	DESCRIPTION
RESMED / NASAL, PILLOW & FULL FACE			
 N20	NASAL	VENTED	Premium nasal mask with a soft high-seal cushion.
 N30i	NASAL • TOP TUBE	VENTED	Under-the-nose nasal mask with top-of-head hose connection.
 P10	NASAL PILLOWS	VENTED	Lightweight pillow mask with minimal facial contact.
 P30i	PILLOWS • TOP TUBE	VENTED	Top-of-head pillow mask with minimal facial contact.
 F20	FULL FACE	VENTED	Full face mask covering the nose and mouth.
 F30	FULL FACE • MINIMAL	VENTED	Minimal-contact full face mask sitting under the nose.
 F30i	FULL FACE • TOP TUBE	VENTED	Top-of-head full face mask with the hose routed clear of the face.
 F40	FULL FACE • COMPACT	VENTED	Compact, flexible full face mask in a smaller footprint.
SVASTEK / HEALING THROUGH INNOVATIONS			
 VAYU	FULL FACE	VENTED	Full face mask with ALLTIP cushion technology, for single-limb CPAP and BiPAP circuits.
 VAYU NV	FULL FACE	NON-VENTED	Non-vented VAYU for ventilator circuits with a separate exhalation valve.
BMC / NASAL & FULL FACE			
 N5	NASAL	VENTED	Nasal mask for CPAP and BiPAP therapy.
 N6	NASAL • COMPACT	VENTED	Compact nasal mask with a comfortable, low-profile fit.
 F4	FULL FACE	VENTED	Full face mask with forehead support.
 F4 NV	FULL FACE	NON-VENTED	Non-vented full face mask for circuits with a separate exhalation port.
 F4 NV2 AAV	FULL FACE • AAV	NON-VENTED	Non-vented full face mask with anti-asphyxia valve.
 F5A	FULL FACE • FOREHEAD-FREE	VENTED	Forehead-free full face mask with an open field of vision.
 F5A+	FULL FACE • MAGNETIC	VENTED	Upgraded F5A with magnetic clips for one-handed fitting.
 FM8D	FULL FACE	VENTED	Full face mask with forehead support, suited to higher pressures.

Vented masks carry built-in exhalation ports and are used on single-limb CPAP and BiPAP circuits. Non-vented masks have no ports and must only be used on a circuit with a separate exhalation valve. Cushion sizes S / M / L stocked where the model offers them. F4 NV and F4 NV2 AAV share the F4 body; F5A+ is the F5A with magnetic clips. Cushion size is measured at fitting, and exchange is available if the seal is not correct.

Oxygen Cylinders & Delivery

A concentrator requires mains power; a cylinder does not. Most oxygen patients keep both. We also stock the regulators, flowmeters and interfaces needed to deliver the oxygen to the patient.

Oxygen Cylinder & Regulator

MS-CY SERIES • B / D / JUMBO

Compressed medical oxygen with regulator, contents gauge and trolley. The standard backup when power fails.

- **Sizes** B-type, D-type and jumbo, with matching trolleys
- **Regulator** contents gauge plus integrated flowmeter
- **Independence** works with no electricity at all

Flowmeter & Humidifier

MS-FM SERIES • 0-15 LPM

Cylinder-mount regulator with contents gauge, flowmeter and bubble humidifier for controlled delivery.

- **Range** 0 – 15 L/min, thumbwheel controlled
- **Fittings** gas-specific probes for pipeline outlets
- **Bottle** autoclavable, marked fill line, anti-spill lid

Humidifier Bottles

MS-HB-02 • AUTOCLAVABLE

Thread onto the flowmeter outlet. Dry oxygen above 4 L/min irritates the nasal mucosa, so these are fitted as standard.

- **Capacity** marked fill line, typically 200 – 300 mL
- **Lid** anti-spill, with pressure relief and outlet nipple
- **Cleaning** autoclavable jar, dishwasher safe

Cannulae & Oxygen Masks

MS-NC • MS-OM SERIES

Nasal cannulae for low flow, plus simple, venturi, non-rebreather and aerosol masks. Adult, paediatric and infant sizes.

- **Cannula** soft prongs, 2 m and 7 m tubing lengths
- **Simple mask** approx. 40 – 60% at 5 – 10 L/min
- **Non-rebreather** up to approx. 90% with reservoir bag
- **Aerosol masks** with medication chamber and tubing, adult and paediatric

CHOOSING AN OXYGEN SOURCE

CONSIDERATION	OXYGEN CONCENTRATOR	OXYGEN CYLINDER
BEST SUITED TO	Long daily hours at home	Backup, transfer and short bursts
SUPPLY LIMIT	Unlimited while powered	Cylinder contents
NEEDS ELECTRICITY	Yes	No
REFILLING	Never	Per cylinder, on exchange
RUNNING COST	Electricity only	Per refill

SAFETY NOTE

Oxygen safety in the home

Every cylinder and concentrator we deliver is handed over with a written safety brief for the household. We check the room, position the equipment away from heat sources, and walk the family through storage, cylinder handling and what to do if the power fails.

- **No smoking or open flame** within 3 metres
- **Cylinders secured upright**, never laid loose

Nebulizers & Suction Machines

Getting medication into the lower airway, and secretions out of it. Both are everyday workhorses, used at the bedside in hospital and at home, and both are available for rental as well as sale.

NEBULIZER

Compressor Nebulizer

HOME MEDIX · PISTON DRIVE

Delivers a fine medicine mist for asthma, COPD and paediatric respiratory care. Compact and simple enough for daily home use.

- **Particle size** fine mist reaching the lower airway
- **Supplied with** adult mask, child mask, mouthpiece, cup, tubing
- **Duty cycle** continuous with thermal cut-out
- **Warranty** 1 year

SUCTION

Suction Machine

MS-SU-40 · TWIN JAR

Twin-jar electric aspirator for secretion and fluid removal. Overflow protection isolates the pump, and the vacuum regulator holds its setting under load.

- **Vacuum** 0.02 – 0.08 MPa, adjustable
- **Flow rate** ≥ 20 L/min free air
- **Jars** 2 × 1000 mL autoclavable with overflow float
- **Models** trolley-mounted or portable bench unit

PERFORMANCE PRIORITIES

Reliable Under Load

Vacuum and compressor pressure hold their setting through continuous use, verified against specification at every service visit.

Efficient Delivery

Consistent particle size and nebulization rate mean the prescribed dose actually reaches the lungs, treatment after treatment.

Simple To Operate

Few controls, simple assembly and washable parts, suitable for a family caregiver after short training.

WHY PARTICLE SIZE MATTERS

Medication only works where it lands

Droplets above about 5 microns are swallowed rather than inhaled; below roughly 1 micron they are breathed straight back out. The useful window is narrow, which is why a compressor that has drifted out of specification wastes most of the dose without anyone noticing.

- **Above 5 µm** deposits in the mouth and throat
- **1 to 5 µm** reaches the lower airway, where it is needed
- **Below 1 µm** is largely exhaled again

CONSUMABLES & ACCESSORIES	ITEM	REPLACEMENT GUIDANCE
SUCTION MACHINE	Collection jar, lid seal, overflow float	Inspect seal monthly; replace when perished
SUCTION MACHINE	Bacterial filter, silicone tubing, catheters	Filter per protocol; catheters single-use
PATIENT MONITOR	SpO ₂ probe, ECG cable, NIBP cuff	Replace on damage; cuffs sized per patient
PULSE OXIMETER	Batteries, silicone finger insert	Batteries as needed; insert annually

Patient Monitoring

Watching the numbers that say whether a patient is stable. A bedside monitor for the ward and high-dependency room, and a fingertip oximeter for the home, both available on rent as well as sale.

MONITORING

Patient Monitor

PHILIPS • MULTIPARAMETER

Multiparameter bedside monitor with configurable display layouts, audible and visual alarms, and stored trends for review during ward rounds.

- **Parameters** ECG, SpO₂, NIBP, RESP, TEMP
- **Display** 8" – 12" color screen, touch or key control
- **Trends** graphical and tabular storage
- **Battery** internal backup for transport within the facility

OXIMETRY

Pulse Oximeter

DR TRUST • FINGERTIP

Measures blood oxygen saturation and pulse rate in seconds. The single most useful home check for any patient on oxygen therapy or CPAP and BiPAP.

- **Range** SpO₂ 70 – 100%, pulse 30 – 250 bpm
- **Display** saturation, pulse rate and plethysmograph
- **Alarm** adjustable low-saturation threshold
- **Also stocked** paediatric and handheld models

WHAT TO WATCH FOR

Oxygen Saturation

SpO₂ is the single most useful home reading for anyone on oxygen or non-invasive ventilation. A sustained fall is the signal to call.

Configured Alarms

Thresholds are set with the treating team at handover rather than left at factory defaults that everyone learns to ignore.

Verified Accuracy

Monitors are checked against reference at each service visit, and probes replaced when readings drift or the cable is damaged.

PARAMETER	TYPICAL RANGE	MEASURED BY
OXYGEN SATURATION	SpO ₂ 70 – 100%	Bedside monitor, fingertip oximeter
PULSE RATE	30 – 250 bpm	Bedside monitor, fingertip oximeter
NON-INVASIVE BLOOD PRESSURE	Systolic and diastolic, with cuff	Bedside monitor
ECG AND RESPIRATION	Continuous trace with trend storage	Bedside monitor

MONITORING AT HOME

A reading is only useful if someone knows what to do with it

When we hand over an oximeter we write down the values that should prompt a call, and to whom. Families are far more likely to act early when the threshold is on paper beside the machine rather than remembered from a conversation.

- **Written thresholds** left with every device
- **Probe sizes** for adult and paediatric use
- **Spare batteries** and cables held in stock

Wheelchairs, Cots & Pressure Care

Wheelchairs, hospital cots and pressure-relieving mattresses are the items families most often rent, and the ones most often needed at short notice when a patient returns home.

RENT OR BUY

Wheelchair

EASYCARE • FOLDING

Folding steel-frame chair with detachable footrests, handrims for self-propulsion and attendant brakes.

- **Frame** folding steel, powder coated
- **Wheels** 24" rear with handrim, 8" front castors
- **Brakes** push-lock plus attendant lever option
- **Variants** reclining, commode, transit, wide seat

RENT OR BUY

Hospital Cot

MS-HB-05 • 2 / 3 / 5-FUNCTION

Manual and electric cots with backrest and knee-rest adjustment, collapsible side rails and locking castors.

- **Functions** backrest, knee-rest, height, trendelenburg
- **Operation** manual crank or electric remote
- **Safety** collapsible side rails, four locking castors
- **Included** IV pole, mattress, headboard and footboard

PRESSURE CARE

Bubble Air Mattress

SYNOCARE • HOME MEDIX AIRQUILT

Alternating pressure air mattress with pump. Reduces pressure points and improves air circulation to help prevent bed sores in bedridden patients.

- **Pump** heavy duty, low noise and low vibration
- **Air pressure** 5 – 7 litres per minute
- **Control** adjustable pressure setting
- **Supplied with** pump, air tubing, sturdy hooks, 1 year warranty

Delivered & Assembled

Brought to the room, assembled in place and checked before handover.

Room Assessment

Doorway widths, floor surface and turning space are checked before a model is recommended.

Transfer Training

Family are shown how to move the patient safely between bed, chair and bathroom.

Pressure Care

Anti-bedsores and alternating air mattresses fitted for patients confined to bed.

SHORT-TERM NEED

Short-term rental

Post-operative recovery, a fracture or a short illness rarely justifies buying a cot or a chair outright. Both are available on monthly rental with delivery, installation and collection included. The deposit is adjusted against purchase if the requirement becomes permanent.

- **Monthly rental** on cots, chairs and mattresses
- **Servicing included** for the rental period
- **Collection** arranged when the need ends

The room has to change before the patient arrives

A cot, a mattress and a chair, delivered together and assembled in place. Most families get one day's notice.

Physiotherapy Products

Supports, braces and therapy aids for recovery, pain management and post-operative use. Sized rather than assumed, and stocked in the sizes that actually move.

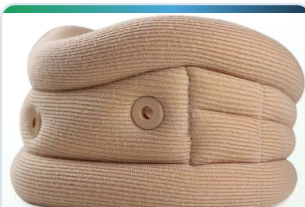

PHYSIOTHERAPY & ORTHOPAEDIC SUPPORTS

Lumbar & Abdominal Belts

TYNOR • S / M / L / XL

Lumbosacral supports with rigid stays for lower back pain and post-operative abdominal support.

Cervical Collars

MS-PT-14 • SOFT / HARD

Soft foam and adjustable rigid collars for neck strain, spondylosis and post-injury immobilisation.

Joint & Limb Supports

MS-PT-20 SERIES

Knee caps, hinged knee braces, ankle and wrist supports, shoulder immobilisers and arm slings.

TENS & Therapy Units

MS-PT-30

Nerve stimulation units for pain relief, plus hot and cold therapy packs and cervical traction kits.

ALSO STOCKED

CATEGORY	ITEMS	SIZING
SPINAL SUPPORT	Lumbosacral belts, abdominal binders, clavicle braces, taylor braces	S / M / L / XL
CERVICAL	Soft foam collars, adjustable rigid collars, cervical traction kits	S / M / L, height adjustable
UPPER LIMB	Arm slings, shoulder immobilisers, wrist and thumb splints, elbow supports	Universal and sized
LOWER LIMB	Knee caps, hinged knee braces, ankle binders, walking boots	S / M / L / XL
THERAPY UNITS	TENS units, hot and cold packs, paraffin wax baths	Single unit
WALKING AIDS	Walking sticks, tripods, walkers, rollators, crutches	Height adjustable

FITTING

A support that does not fit is a support that gets left in a drawer

Belts and braces are measured at the counter, not guessed from a size chart. Most of these are prescribed after surgery or injury, so we check the fit against the clinical note rather than only against the patient's waist.

- **Measured at fitting**, sizes exchanged if wrong
- **Prescription checked** before a brace is issued
- **Washable covers** and replacement straps stocked

Rent or Buy

Every product in this catalogue is available both ways. Which one is right depends almost entirely on how long the equipment will be needed, and that is usually knowable at the point of discharge.

RENT

When the need has an end date

Post-operative recovery, a fracture, a chest infection, or a hospital discharge where nobody yet knows how long care will be needed. Rental costs a fraction of purchase and ends when the need does.

- **Monthly terms** on cots, wheelchairs, mattresses, concentrators, CPAP and BiPAP
- **Delivery, installation and collection** included
- **Servicing included** for the whole rental period
- **Deposit adjusted** against purchase if the need becomes permanent
- **Extendable** month to month, with no fresh delivery charge

BUY

When therapy is for the long term

Sleep apnea, COPD, and any prescription expected to run for years. Beyond roughly eight to twelve months of continuous use, ownership is normally the cheaper route, and the machine is configured to one patient.

- **Manufacturer warranty** registered in the patient's name
- **Installation and training** included
- **AMC and CMC contracts** available from year two
- **Consumables** supplied on a replacement schedule
- **GST invoice** for insurance and institutional claims

WHICH APPLIES TO YOUR CASE

SITUATION	USUALLY RENT	USUALLY BUY
DISCHARGE AFTER SURGERY	Cot, air mattress, wheelchair, commode	Rarely
CHEST INFECTION OR SHORT ILLNESS	Oxygen concentrator, nebulizer, suction	Rarely
NEWLY DIAGNOSED SLEEP APNEA	Trial period before deciding	CPAP or BiPAP and mask
LONG-TERM OXYGEN THERAPY	Backup cylinder	Concentrator
COPD OR NEUROMUSCULAR DISEASE	During an acute episode	BiPAP, oximeter, nebulizer
PERMANENT MOBILITY LOSS	While fitting is assessed	Wheelchair, cot, mattress
WARD OR NURSING HOME FIT-OUT	To bridge a delivery gap	Monitors, suction, cots

OUR POSITION

We will tell you when renting is the cheaper answer

A family setting up a room after a stroke is rarely in a position to work out whether they need equipment for six weeks or six years. Ask us, and we will say which we think applies, including when that means a smaller order for us. Getting it wrong in either direction costs you money.

- **Rates quoted** on the call, not after a site visit
- **Trial before purchase** on CPAP and BiPAP
- **Switch from rent to purchase** at any point

Consumables, Service & Support

Replacement intervals for every consumable in the range, and the service terms that apply to every product in this catalogue.

RENTAL, SERVICE & SUPPORT

SERVICE 01

Rental & Delivery

Monthly rental on cots, wheelchairs, concentrators, CPAP and BiPAP units. Delivered, installed and collected, with servicing included for the rental period.

SERVICE 02

Installation

Siting and commissioning at ward or home. Oxygen purity, flow accuracy, vacuum and therapy pressure verified on site before handover.

SERVICE 03

Maintenance & AMC

Scheduled visits covering filter changes, purity checks with an analyzer, pressure verification and a documented service history per unit.

SERVICE 04

Technical Support

Helpline triage, on-site breakdown response against agreed turnaround targets, genuine spares, and standby units on critical equipment.

SERVICE CONTRACTS

COVER	AMC	CMC
SCHEDULED VISITS	Included	Included
LABOUR ON BREAKDOWN	Included	Included
SPARE PARTS	Charged separately	Included
CONSUMABLES AND FILTERS	Charged separately	Optional add-on
STANDBY UNIT ON CRITICAL EQUIPMENT	Subject to availability	Included
BEST SUITED TO	Home and single-unit users	Wards and multi-unit sites

TALK TO US

Your Partner in Advanced Healthcare Solutions

Send us a prescription, a discharge summary or a list of requirements. We will return a configured proposal covering equipment, consumables, delivery, and a rental versus purchase comparison.

CONTACT

medspok@gmail.com
5/3 Thiruvengadam, 1st St, Karambakkam,

Thank you for reading

Thank you for your time and your trust

A PARTNERSHIP, NOT A TRANSACTION

Everything in these pages is held at our premises in Porur, available on **monthly rental** or for **outright purchase**, and serviced by our own engineers. We deliver to the room, assemble in place, fit the interface, and show whoever will be operating the equipment how to use it before we leave.

If you are preparing a room for someone coming home from hospital, starting on CPAP or BiPAP therapy, or fitting out a ward, send us the requirement and we will come back with a configured proposal covering the equipment, the consumables and the maintenance plan, priced together.

Specifications, availability and pricing are confirmed with every quotation. We are always glad to arrange a demonstration before you decide.
